Subject: FW: Wolverine Worldwide news item

Denise/Sheri:

FYI PFOS in Rogue River fish maybe related to with former Wolverine Tannery waste.

EPA was petitioned to investigate this site in June 2011.

EPA conducted a PA and the site scored above 28.5

The state recommended the site remained with the state and we agreed– June 2012.

The site is designated “OCA” with DEQ (it managed under the state’s cleanup authority) after both Site Assessment and Removal Program investigated the site.

PFOS were not investigated at the time.

This is an FYI Just in case we get questions from the press.
